

TO: DEVELOPMENT REVIEW BOARD **DATE:** November 7, 2002
FROM: CURRENT PLANNING SERVICES
SUBJECT: CASE 53-DR-2002
REQUEST: Approve Exterior & landscaping modifications
PROJECT NAME: Rush Bar/Lounge
LOCATION: 4426 N Saddlebag Tr

DEVELOPER/OWNER: Recor Group, Inc.
ARCHITECT/DESIGNER: Orange Creative
ENGINEER: Peterson Associates, Inc.
APPLICANT/COORDINATOR: Lucid Entertainment/Ryan Jocque
15490 Ventura Blvd Suite 235
Sherman Oak, CA 91403
310-213-4971

STAFF RECOMMENDATION: APPROVE subject to the attached stipulations.

PUBLIC COMMENTS: There have been no comments from the public at the time of drafting this report.

REQUEST: The request is for the approval of a new site/landscape plan and elevations for an exterior façade renovation on the existing office building located on Saddlebag Trail. The applicant plans on opening a bar/lounge in the building.

LOCATION & ZONING: The existing office building is located in Downtown, specifically at the northwest corner of Indian Plaza and Saddlebag Trail. The property is zoned Central Business District (C-2), Passenger Automobile Parking (P-2), and Parking District (P-3). All of the properties surrounding the site are existing with the same zoning.

DISCUSSION: The changes to the existing site plan include adding stairs and ADA ramp leading up to the front door, new raised planters along the east façade (front), wood benches and seating areas along the south façade (side), remove part of the covered parking structure in the back of the site, and adding a trash dumpster and enclosure. Vehicular access to the site comes from an alley along the western property line. Parking requirements are met with four on-site parking spaces, P-3 zoning district credits, on-street parking credits, and a remote parking agreement. The remote agreement is with the office building located at 7332-7402 Camelback Rd., which is within 600 ft. of the site.

The applicant proposes to renovate the front of the building by breaking up the wall plane and raising the middle section of the façade to 22 ft. and add 3 ft. to the side parapet walls which helps hide mechanical equipment. A new recessed front door and a metal canopy over the front entrance will also be added. The wall plane of the south elevation will be broken up with three vertical metal features, the addition of cantilevered seating benches, and the extension of the 8 ft. high screen wall along the

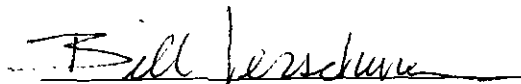

façade (attached to existing wall). All walls will be resurfaced with smooth stucco painted a light khaki accented with a dark khaki.

The proposed modifications to the site plan and elevations meet the Downtown Design Guidelines in some of the following ways:

- Divide the elevations into smaller parts (change in wall planes and heights)
- Shaded circulation space (covered entry)
- Building materials similar to those predominant use on street (stucco)
- Street furniture provided along the street (cantilevered benches)
- Warm earth tone colors (light & dark khaki)

The landscaping on site will remain the same, with the addition of some shrubs and horse reed.
