**THE MOST VERSATILE LIGHT AVAILABLE**

The proven precision technology of the one of the most reliable spotlights on the market and its three primary features make it the most versatile lighting design tool in the lighting industry today. The M2 can be mounted on an uplight stand, downlight and on the new state-of-the-art adjustable arm.

It offers several features that set it apart from other spotlights. It features a secondary system that allows you to change the shape, color, size, and intensity of light output. A wide array of effects can be produced by utilizing our patented "beamshifting technology" on one of our most popular effects, such as lens or glass combinations.

This spotlight is engineered for the lighting designer who requires a "Swiss-army" approach to every project.

For more information, contact us at 800-845-2222 or visit our website at [www.ledco.com](http://www.ledco.com) and request the "M2" literature.

**TOP LIGHT, STANDING LUMINAIRE**

When trying to create a super soft, comfortable atmosphere, one way to go is by using recessed lighting. The point of putting it in is to make it disappear. Recessed lighting is a great choice for creating a subtle, sophisticated atmosphere. It's a great choice for creating a subtle, sophisticated atmosphere. It's a great choice for creating a subtle, sophisticated atmosphere.

At FX, we suggest that designers use multiple types of lighting to create a layered, sophisticated atmosphere. It's a great choice for creating a subtle, sophisticated atmosphere. It's a great choice for creating a subtle, sophisticated atmosphere.

Compare FX copper luminaire with other types of lighting. The difference in the way it is used is the key to its success. It's a great choice for creating a subtle, sophisticated atmosphere. It's a great choice for creating a subtle, sophisticated atmosphere.

## CoverLite

The CoverLite is at home in fine landscape architectural structures such as arbors, trellises or dining pavilions. This fixture creates the same effects as an interior recessed can light thereby extending sophisticated lighting design techniques to the outdoors. The CL is precisely machined from solid copper which blends beautifully with redwood surroundings. For painted wood applications specify the white finish which can easily be painted to match any existing color. □

## ACI BeamLite

Similar to the CoverLite but designed to surface mount onto beams or posts. The halogen lamp is adjustable to allow maximum forward projection making this unique model well suited for illuminating steps or color pots from adjacent structures. Milled from solid copper with stainless hardware this luminaire will enhance any fine lighting project. □

## VineLite

When a moonlighting effect is desired but the caliper of a tree is too small specify the VineLite. This micro downlight actually hangs from the host tree by a cinch tie requiring no screws or permanent hardware. Use two or more fixtures for an even illumination. A small brass hook also included for beam mounted applications. Milled from heavy
