     c) Phone Number: 623-328-3519

     d) Advance notice required: 90 Days

Signed _____   Date   1/5/2009

Cox Communications has underground fiber optic on the West side of Pima Rd. Improvement plans do not reflect Cox Communications facilities. However, there do not appear to be any conflicts with Cox Communications facilities and the proposed city improvements. Contact Deidra Bryant with the Cox Communications Engineering Department at (623) 328-3569 or email phx.EngineeringMappingRequests@cox.com to obtain our facility maps. Ensure you request our fiber facility maps in your request. Submit all updated/revised plans for review as new facilities may be placed within the scope of this project after this review. Additionally, resubmit the most current plans for review should the NTP be 180 days after the date of this review.

Immediately notify Cox Communications Engineering Department of any discrepancies or conflicts determined subsequent to this plan review. Allow a minimum of 30-days to resolve conflicts that arise as a result of the construction of this project. Cox Communications does not maintain installation records of customer drops that may conflict with this project. Notify Cox Communications Engineering Department of all utility coordination meetings, pre-construction meetings and construction schedules including the NTP date.

All data contained in this clearance letter was based on information available at the time of its preparation. Cox Communications neither encourages reliance on, nor warrants, the location of underground utilities drawn in the project plans or the accuracy of Cox system prints. Please call Blue Stake before digging or trenching. Failure to contact Blue Stake may result in violations of A.R.S. SS 40-360.21 and 40-360.22A.
