

## **Notre Dame Preparatory High School**

### **Pre-Application Narrative**

**May 31, 2012**

In October 2010, the City Council approved a new campus master plan proposal for the purpose of adding to the existing academic buildings to accommodate higher enrollment projections of 1,200 (an increase from 1,000) and expand curriculum needs, as well as to accommodate additional fine arts and athletic programs. Future expansion includes a performing arts center, gymnasium expansion, new/additional classrooms, and a football stadium with athletic facilities as well as a more functional and neighborhood friendly student drop off and parking scheme.

The first two phases of construction includes the loop road and parking on the western end of the site (Phase 1) and the football stadium (Phase 2). Notre Dame Prep would like to construct the loop road and parking as soon as possible. Exact timing of the football stadium is yet to be determined but has been identified as Phase 2.
