Review Methodologies

Review Methodologies

The City of Scottsdale maintains a business and resident friendly approach to new development and improvements to existing developments. In order to provide for flexibility in the review of Development Applications, and Applications for Permitting, the City of Scottsdale provides two methodologies from which an owner or agent may choose to have the City process the application. The methodologies are:

1. Enhanced Application Review Methodology

Within the parameters of the Regulatory Bill-of-Rights of the Arizona Revised Statutes, the Enhanced Application Review method is intended to increase the likelihood that the applicant will obtain an earlier favorable written decision or recommendation upon completion of the city's reviews. To accomplish this objective, the Enhanced Application Review allows:

- the applicant and City staff to maintain open and frequent communication (written, electronic, telephone, meeting, etc.) during the application review;
- City staff and the applicant to collaboratively work together regarding an application; and
- City staff to make requests for additional information and the applicant to submit revisions to address code, ordinance, or policy deficiencies in an expeditious manner.

Generally, the on-going communication and the collaborative work environment will allow the review of an application to be expedited within the published Staff Review Time frames.

2. Standard Application Review Methodology:

Under the Standard Application Review, the application is processed in accordance with the Regulatory Bill-of-Rights of the Arizona Revised Statutes. These provisions significantly minimize the applicant's ability to collaboratively work with City Staff to resolve application code, ordinance, or policy deficiencies during the review of an application. After the completion the city's review, a written approval or denial, recommendation of approval or denial, or a written request for additional information will be provided.

The City is not required to provide an applicant the opportunity to resolve application deficiencies, and staff is not permitted to discuss or request additional information that may otherwise resolve a deficiency during the time the City has the application. Since the applicant's ability to collaboratively work with Staff's to resolve deficiencies is limited, the total Staff Review Time and the likelihood of a written denial, or recommendation of denial is significantly increased.

In addition to the information above, please review the Development Application, and/or the Application for Permitting flow charts. These flow charts provide a step-by-step graphic representation of the application processes for the associated review methodologies.

Wireless Antenna Modification

33016 N. 60th Street
Scottsdale, AZ 85266

APN: 211-61-757

ICC
4294 E. Del Rio Street
Gilbert, AZ 85295
602-550-5700

Purpose of Request:

As a result of new technology and customer demand for improved wireless services, Verizon Wireless is requesting approval to modify its equipment on the existing wireless communication facility (WCF) at the address listed above (football field light pole at Cactus Shadows High School).

Description of Proposal:

Verizon Wireless is proposing to add (3) panel antennas, replace (1) of (3) existing panel antennas, and add ancillary equipment at the 62' centerline of the 81' stadium light pole.

Visual Impact:

The proposed antenna modification will pose a very limited visual impact to the surrounding community. The new antennas are identical in size to the existing antennas. The antenna mounts will extend no more than 2' from the face of the pole. The proposed ancillary equipment will be hidden behind the antennas. The feed line coax will be hidden behind the existing painted metal shroud and the antennas will be painted to match the color of the existing pole and antennas.

Hours of Operation:

The site will operate twenty-four hours a day, seven days a week, but is an unmanned facility with no personnel or regular hours of operation.

Development Schedule

The overall development of the site will take place as soon as zoning and building permits are approved by the City. Overall, the work will take no more than 72 hours to complete.

After the completion of construction, the site will only require general maintenance (once or twice a month), with limited site visits by field technicians.

Summary

The proposed antenna modification will provide high quality reliable service and additional bandwidth to Verizon Wireless customers, commuters, residents, businesses and first responders. Verizon Wireless is committed to developing the best wireless system for its customers while working cooperatively with the City of Scottsdale and the local community.
