## **Neighborhood Notification Letter**

Existing Wireless Communication Facility Modification  
Scottsdale Pima Inn  
7330 N. Pima Road, Scottsdale, AZ 85258

### **Project Narrative**

This is a request for both a renewal to the Conditional Use Permit (Case 38-UP-2011, expired 9/11/17) and a zoning request to allow modification of an existing cell tower to include an upgrade of equipment by AT&T on a tower operated by Crown Castle. The proposed modifications include:

REMOVING (3) antennas and (3) Remote Radio Heads (RRHs),  
REPLACING (3) antennas, (6) RRHs and (1) power plant,  
RELOCATING (3) RRHs,  
INSTALLING (1) new cabinet within the existing AT&T equipment enclosure.

Recently, the owner of the hotel obtained a Conditional Use Permit renewal to redevelop the parcel and move this monopalm to a location further north on the property. However, the hotel owner has decided not to pursue this action and we are now seeking a renewal of the Conditional Use Permit to remove 3 antennas and replace 3 antennas on the monopalm in its current location.

The proposed request does not significantly change the existing cell tower and this proposal actually reduces the total number of antennas from nine to six on the monopalm. The relocated and replaced remote radio heads will be placed behind the existing antennas and will not be seen. Included in this modification is the refronding of the faux palm fronds with a mix of 10 foot and 8 foot branches to conceal the antennas. With the antennas and existing faux palm branches providing concealment, the new equipment will hardly be noticeable. The new cabinet on the ground will be concealed within the existing equipment compound.

The monopalm is located adjacent to and behind a commercial hotel property along Pima Road. The faux palm is adjacent to a real palm tree to aid the site in blending into the existing scenery. The monopalm tower is 55' in height, with palm fronds extending to 63'. Property to the north is used as a commercial hotel site, and property to the south and west is residential property, which is primary reason the site is disguised. Even to residents in the immediate area, changes to the tower will hardly be noticeable since the height of the tower and width of the antenna arrays will not change and total antenna count will decrease.

There is no impact to car or pedestrian traffic in the area. Other than the initial installation process, which may take a couple of days, the site continues to be unmanned and will only be

accessed for periodic maintenance visits. Traffic in and out of the hotel and residential property will not be affected. There will be no change to the site in regards to noise or lighting.

The new equipment will improve coverage in the area for local residents, visitors, businesses and emergency responders. AT&T considers this upgrade necessary to keep pace with technology demands from smartphones and other handheld devices.
