

PLANTERS

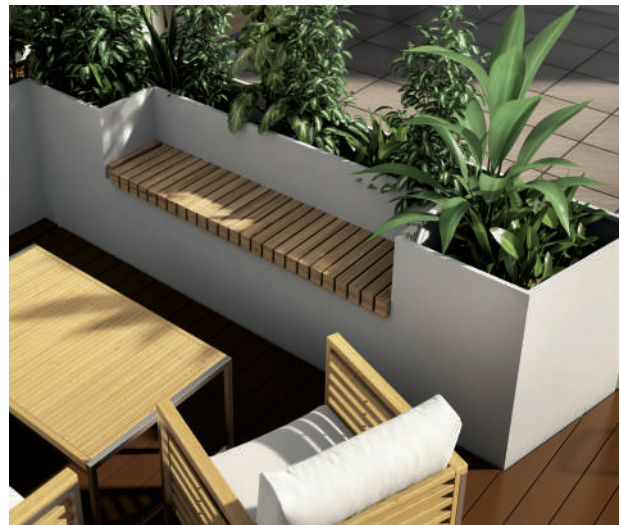

Steel Planters & Benches

Made from steel, with a choice of standard and custom options, Corten Studio planters and bench systems are the perfect solution for modern roof terraces, podiums, public areas and private gardens

Planters

Designed by Us and Shaped by You

Creating enjoyable, practical spaces in urban areas has its challenges, but with versatile and high-quality designs, Corten Studio planters are an ideal way to define plants, trees, and green spaces. Made from steel, with a choice of standard and custom options, Corten Studio planters and bench systems are the perfect solution for modern roof terraces, podiums, public areas and private gardens. Developers and specifiers choose these lightweight commercial planters for their charming aesthetics and practical applications, as well as their speed and simplicity to install.

Planterline Collection

Custom Design Pre-Formed Planter System

The Planterline collection is a ¼" thick steel system making it the ultimate option for creating a retaining wall structure to almost any design. This system can be formed to curved or straight designs and reduce or increase in height throughout the length.

Suitable For

- Podiums and Terraces
- Public areas
- Private gardens

Advantages

- High quality panel system available in bespoke sizes
- Can be preformed to curved or straight designs
- Supplied with triangular support brackets and hidden connections

Underlighting Detail

Create Ambient Spaces

Lighting strips can be incorporated into any planter wall system and are ideal for mood lighting a roof terrace or function space. We supply all the housing which means simple installation and no mess. Lighting options include spotlights, wash lighting, recessed lighting, and top edge plant lighting.

Suitable For

- Terraces and roof terraces
- Restaurant and bar areas
- Pathways
- Shopping centers

Advantages

- Additional lighting allows you to develop inspiring landscapes
- Lighting supplied with planters for easy installation
- Optional LED placement for mood lighting or safety feature

Finish Options

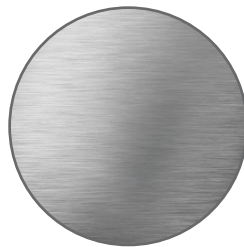

Unlimited Possibilities with Corten Studio Finishes

When we started creating custom planters 5 years ago corten steel was at the hottest it ever has been. We now have created endless design possibilities by offering not only corten, but we can create our planters from aluminum, galvanized steel, stainless steel, and even brass or copper sheet if required. Please see the below list of some of our more popular finishes we offer:

Metal Finishes

Corten

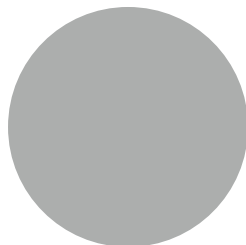

Stainless Steel

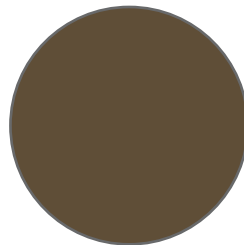

Galvanized

In addition to metal material choices, we have invested heavily to bring you over 300+ RAL powder coat finishes to choose from when designing your project's planters. Please see below a list of some of our more popular finishes we offer. If you don't see the color you are looking for, please visit www.ralcolor.net for more information or contact a member of our sales to order samples.
