Project Description: AT&T Wireless is seeking permission to setup a temporary facility for the 2023 Waste Management Open from 12/01/2022 – 2/15/2023 to supplement wireless cell coverage during the event. This site will not negatively affect the surrounding area during this timeframe.

AT&T is planning to construct a 71'-3" multi-carrier temp tower during the event to help with call capacity for the increased usage in the area. The pole will be 71'-3" tall when erected with AT&T collocating three (1) antenna mounted at 45' and two (2) antennas mounted at 38'. Verizon will install six (6) antennas mounted at 50'-10", one (1) antenna mounted at 60'-10" and one (1) antenna mounted at 67'-6". T-Mobile will install two (2) antennas mounted at 54'-10". The total project area is approximately 40' X 18' and will be fenced with chain link for security. The site will also contain one (1) generator for AT&T and one (1) generator for Verizon and (1) generator for T-Mobile to be located within the fenced area for backup power.

Location: The steel pole will be located on the golf course as depicted on the site plans. The location is to the West of the 16th green grandstands and sites in the lowest part of the slope. The property is owned by the City of Scottsdale and AT&T is currently working with the City of Scottsdale to secure the lease rights to the temporary space.

Access: Access to the temporary facility will be from Hayden road prior to the event for setup and again after the event. Access during the event will be from the clubhouse parking lot in the event the site needs to be visited during the event.

FAA: The proposed project meets the FAA "Determination of No Hazard" standards and does not require any lighting.

Hours of operation: The temporary facility will be operation for 24hrs a day during the temporary use permit period to ensure that there is adequate coverage for patrons, sponsors, and employees during event and related activities.
