

Sec. 7.200. - Additional Area Regulations.

H. *Wireless communications facilities (WCF)*. The purpose of the WCF regulations is to encourage and promote wireless communications coverage for all areas of the city while minimizing the visual, environmental, and neighborhood impacts. ~~The preferred WCF locations include locations having the least amount of visual and neighborhood impact. More preferred locations include commercial and industrial areas, and less preferred locations include residential and school areas. The wireless communications service providers shall adhere to all applicable federal regulations, such as the Federal Communications Commission (FCC) and the National Environmental Protection Act (NEPA). Locations may require an environmental assessment.~~

1. *WCF concealment and screening*. All WCF antennas, mounting hardware, and cabling shall be covered or painted to match the color and texture of the building, tower, or pole on which it is mounted. Equipment cabinets, service panels, and service connections shall be screened by solid walls, landscaping, or berms. Screening shall blend with or enhance the surrounding context in terms of scale, form, texture, materials, and color. WCF shall be concealed as much as possible by blending into the natural and/or physical environment. ~~All gates shall be opaque.~~
2. *WCF height*. The height of free-standing WCF shall be measured from natural **FINISHED** grade to the top of all appurtenances.

4. ~~*WCF co-location*. All new monopoles or towers over forty (40) feet in height shall allow for co-location by other wireless communications service providers. The applicant shall demonstrate that the engineering of the monopole or tower and the placement of ground-mounted WCF will accommodate other providers' WCF. The owner of the tower or monopole and the property on which it is located must certify that the monopole or tower is available for use by another wireless communications service provider on a reasonable and non-discriminatory basis.~~
54. *WCF lighting*. Any exterior lighting for WCF shall be fully shielded, screened by the same screening surrounding the WCF, and located below the height of the screening.
6. ~~*WCF identification*. Each WCF shall be identified by a permanently installed plaque or marker, no larger than four (4) inches by six (6) inches, clearly identifying the wireless communications service provider's name, address, e-mail contact, and emergency phone number.~~
75. *Temporary WCF*. All temporary WCF shall be limited to being in conjunction with a special event, **WCF EQUIPMENT UPGRADE, RELOCATION OF AN EXISTING WCF** or be in response to an emergency or disaster as determined by the Zoning Administrator.
