Re: May 16, 2023 Agenda Item #2 - 37-DR-2021#2 (Hazel & Azure Canal Bank Improvements)

Honorable Mayor and City Council Members,

At their May 4, 2023 meeting the Development Review Board approved case 37-DR-2021#2 (Hazel & Azure Canal Bank Improvements) with a vote of 6-0. The Board's motion included a new stipulation related to the site walls that are proposed along the Hazel & Azure project frontage.

The added stipulation language is as follows:

"The proposed 5' screen wall(s) located along the canal bank frontage are approved as shown if the ground floor land use within the building along the canal frontage is residential. If the ground floor land use along the canal frontage is public or amenity the screen walls shall be removed."

Please find attached to this memo the DRAFT May 4, 2023 Development Review Board meeting minutes and updated case stipulations for 37-DR-2021#2.

BACKGROUND

City Council Review

The subject site received zoning entitlements for a mixed-use development plan in 2011, under the name BlueSky, which included up to 749 residential units and approximately 128 feet of building height across the site. Ordinance No. 3909, which granted approval of the existing development plan, requires that the City Council act as the final design review approving authority on this project.

At the September 20, 2022 meeting, the City Council granted design review approval of the site plan, landscape plan, and building elevations for the new mixed-use development with approximately 532 residential units and 14,610 square feet of commercial floor area on the +/- 3.73-acre site, after the Development Review Board approved the case on August 18, 2022.

With the September 20, 2022 City Council approval, the design of the associated canal bank improvements was not complete, as the owner was still in coordination with Salt River Project (SRP) and the Maricopa County Flood Control District (FCD) on what would be allowable for improvements within the canal bank right-of-way. The Development Review Board, and subsequently the City Council, approved the proposed development with a stipulation that the applicant return to the Development Review Board and City Council for approval of the canal bank improvements prior to issuance of any building permits for the development. This request is specifically for the canal bank improvements.

The Development Review Board is scheduled to review the proposal at their May 4, 2023 meeting. The Development Review Board recommendation will be provided to the Council in a supplemental packet.

Zoning

The site was annexed into the City in 1961 (Ord. #121) and zoned to the Highway Commercial (C-3) zoning designation. In 1988 the property was zoned to the Downtown district with the Planned Blocked Development overlay as part of larger mixed-use development. There have been several zoning revisions on the site and original project area over the last 30 years. The current zoning designation of Downtown Regional Commercial Office, Type 2, Planned Block Development, Downtown Overlay (D/RCO-2 PBD DO) was most recently amended in 2011 with Ordinance No. 3909, which approved the development plan for BlueSky. The southern portion of the canal bank also includes Highway Commercial Downtown Overlay (C-3 DO) zoning.

Context

Located on the east side of Scottsdale Road, approximately 650 feet north of Camelback Road in Old Town Scottsdale, the site is situated in an area with a mix of retail, office, and multi-family residential uses. The site was originally occupied by a resort built in the 1950s (demolished in the late 90's). To the west is Scottsdale Fashion Square Mall and north is a vehicle sales and service use. The parcel to the south is occupied by a retail center and to the east are multi-family residential buildings most recently constructed in 2020. The section of canal bank which is the subject of this request extends from the Hazel and Azure site frontage south all the way to Camelback Road (a segment approximately 740 feet long).

Adjacent Uses and Zoning

- North: East Coolidge Road (a private drive), and further north is a 3-story car sales and service building, zoned Central Business (C-2).
- East: Existing 5-story multiple-family residential development, zoned Downtown Regional Commercial Office, Type 2, Planned Block Development, Downtown Overlay (D/RCO-2/PBD/DO), and the Arizona Canal.
- South: Existing single-story retail building, zoned Highway Commercial, Downtown Overlay (C-3/DO).
- West: North Scottsdale Road, and further west is Scottsdale Fashion Square Mall, zoned Downtown Regional Commercial Office, Type 2, Planned Block Development, Downtown Overlay (D/RCO-2/PBD/DO).

APPLICANT'S PROPOSAL

The owner is requesting approval of the canal bank improvements associated with the Hazel & Azure mixed-use development (37-DR-2021). The approved development plan from zoning (65-ZN-1992#7) includes stipulations for public canal bank improvements extending from the project's frontage, south to E. Camelback Road. Hazel & Azure is a mixed-use development with approximately 532 residential units and 13,650 square feet of commercial floor area on the +/- 3.73-acre site, which received approval by the Development Review Board at its August 18, 2022 meeting. When the proposal was presented to the Board in August of 2022, the design of the associated canal bank improvements was not complete, as the owner was still in coordination with Salt River Project (SRP) and the Maricopa County Flood Control District (FCD) on what would be allowable within the canal bank right-of-way. The Development Review Board, and subsequently the City Council, approved the proposed development with a stipulation that the applicant return to the Development Review Board and City Council for approval of the canal bank improvements prior to issuance of any building permits for the development.

Over the past several months the applicant has continued to work with City staff, SRP and FCD to develop and receive approval of the canal bank improvements. The proposed improvements consist of landscaping, hardscaping, lighting, and other amenities from the northern edge of the Hazel & Azure site extending along the north/west side of the canal bank all the way to E. Camelback Road. The sections of canal bank that are directly adjacent to the Hazel & Azure development and the southernmost 150 feet adjacent to E. Camelback Road will receive enhanced improvements including landscaping, specialty paving, raised planters, concrete benches, and decorative walls. The section of

canal bank in between the Hazel & Azure development and the Camelback Road section has substantial stormwater infrastructure and grades that must be maintained. Due to these constraints the canal bank improvements in this section will have more limited landscaping and do not include any benches, walls, or raised planters. The entire length of the improvements will include a new 10-foot-wide sidewalk and in-grade path lighting.

Please see Attachments 7-10 to reference the stipulated canal bank improvements and the applicant’s proposed canal improvements.

Development Review Board Criteria

Staff and the Development Review Board previously confirmed that the overall development meets the applicable Development Review Board Criteria with case 37-DR-2022. The proposed canal bank improvements are an extension of the prior approvals and are consistent with the design theme that was previously approved. Staff confirms that the proposed canal bank improvements are generally consistent with the applicable Development Review Board Criteria.

Regarding: Zom Scottsdale

Subject: Canal Bank Improvements

As part of the Zom Scottsdale improvements, the north Arizona Canal right of way between the property and Scottsdale Road will be improved to provide additional landscape and pathway lighting and to accommodate pedestrian, bicycles and SRP maintenance access.

This section of canal bank ROW has existing FCD drainage structures and existing SRP transformers, as well as a significant drainage swale, that could not be modified per FCD requirements. No large trees were permitted within 5 feet of the existing drainage structures and no vertical elements such as trees or light standards were allowed within 20' of the canal edge. Zom worked closely with SRP and FCD to protect these existing elements in place and to provide the minimum clearance and set back requirements per FCD and SRP requirements.

The resulting design accomplishes the following:

- 10' wide concrete pathway connecting existing improvements north of the site to the intersection of Scottsdale and Camelback Roads. Pathway provides improved continuity to existing regional pathway system through the downtown area and complies with minimum SRP maintenance access requirements for the canal frontage.
- Enhanced paving and landscape at the street intersection in keeping with the Scottsdale Road design standards, including Lithocrete inlay and shaded seating.
- Creation of a neighborhood, publicly accessible Pocket Park adjacent to the Azure development at the north end of the canal bank improvements.
- The existing slope of the existing drainage swale associated with the FCD structures, will be redeveloped to remove the existing gunite, to be replaced with permeable erosion control matting, allowing this area to be fully landscaped with small trees, shrubs and groundcovers per SRP guidelines.
- All trees adjacent to FCD drainage structure will be installed with rigid root barriers to protect existing structures.
- Lighting: SRP will not allow vertical elements within 20' of the canal edge, including light poles or bollards. As such, the entire length of the pathway will be lighted utilizing low ground level light fixtures, that will meet safety standards without impeding SRP maintenance access requirements.

Although existing FCD and SRP infrastructure within this section of ROW limited certain types of improvements, Zom worked diligently with each governing body to find acceptable solutions that will greatly improve the function and aesthetics of this portion of canal frontage. The proposed improvements will create a significantly enhanced pedestrian connection along this stretch of canal right of way, similar to look and feel of the developments to the north of the project.

EFC120 LED Inground Luminaires

2/6

Description
IP67, Class I, IK09. Stainless steel construction inground section. Marine-grade, die-cast aluminum alloy dome. SCE superior corrosion protection including PCS hardware. Semi-recessed, directional LED marker light with controlled single- or double-sided distribution. Silicone CCG® Controlled Compression Gasket. Luminaire can be driven over at low speeds only; it is not designed for normal traffic conditions, and can be damaged under such conditions as braking, accelerating, or turning. Factory-sealed termination chamber complete with cable gland and 4 ft of flexible PVC-rise cable. CAD-optimized optics for superior illumination and glare control. Integral driver in thermally separated compartment. Factory-installed LED circuit board. "No tool" removable gear/lens tray. Suitable for flush installation in concrete or earth. Luminaire requires installation blackout which is included in supply; blackout is designed for installation in concrete. IP68 in-line connector facilitates easy removal for off-site lamp replacement. Specify product with 7 Digit product code - Finish Color. Accessories, such as mounting, optical, and electrical, must be specified separately. Example: XXX-XXXX-9004 (Black) + XXX-XXXX (Accessory 1)

Bryan,

As discussed, Hazel and Azures current canal bank proposal is unacceptable as it does not meet their stipulation from 2007 (see attached). Please note that the approved plan already considered the box culvert inlet condition and proposed a short retaining wall along the outside edge of the canal ROW. Even if FCD does not allow a small retaining wall in their ROW, there's plenty of room to widen the top of bank and simply slope the outer edge to catch grade, as depicted on the image below. Another option is to raise the box culvert inlet. Have either of these options been explored? I understand that they may have run into resistance from SRP/FCD but defaulting to leaving this segment narrow in lieu of exploring all options is not right or in the best interest of the City, the community &/or the surrounding properties. Nobody bothered to reach out to us. As discussed, it is critical to provide the full width improvements, not only from an esthetic value at this key location, but also to create enough space for the eventual bridge to land that will be extended across the canal from our proposed Edition hotel to the east.

In summary, there are solutions that do not appear to have been considered. I suggest a stipulation that requires them to either comply with the full-width requirements, or suggest you continue the case to allow time for proper coordination between vested parties. Unfortunately, the first we heard of their intent to do something other than what was approved, is from your email of yesterday.

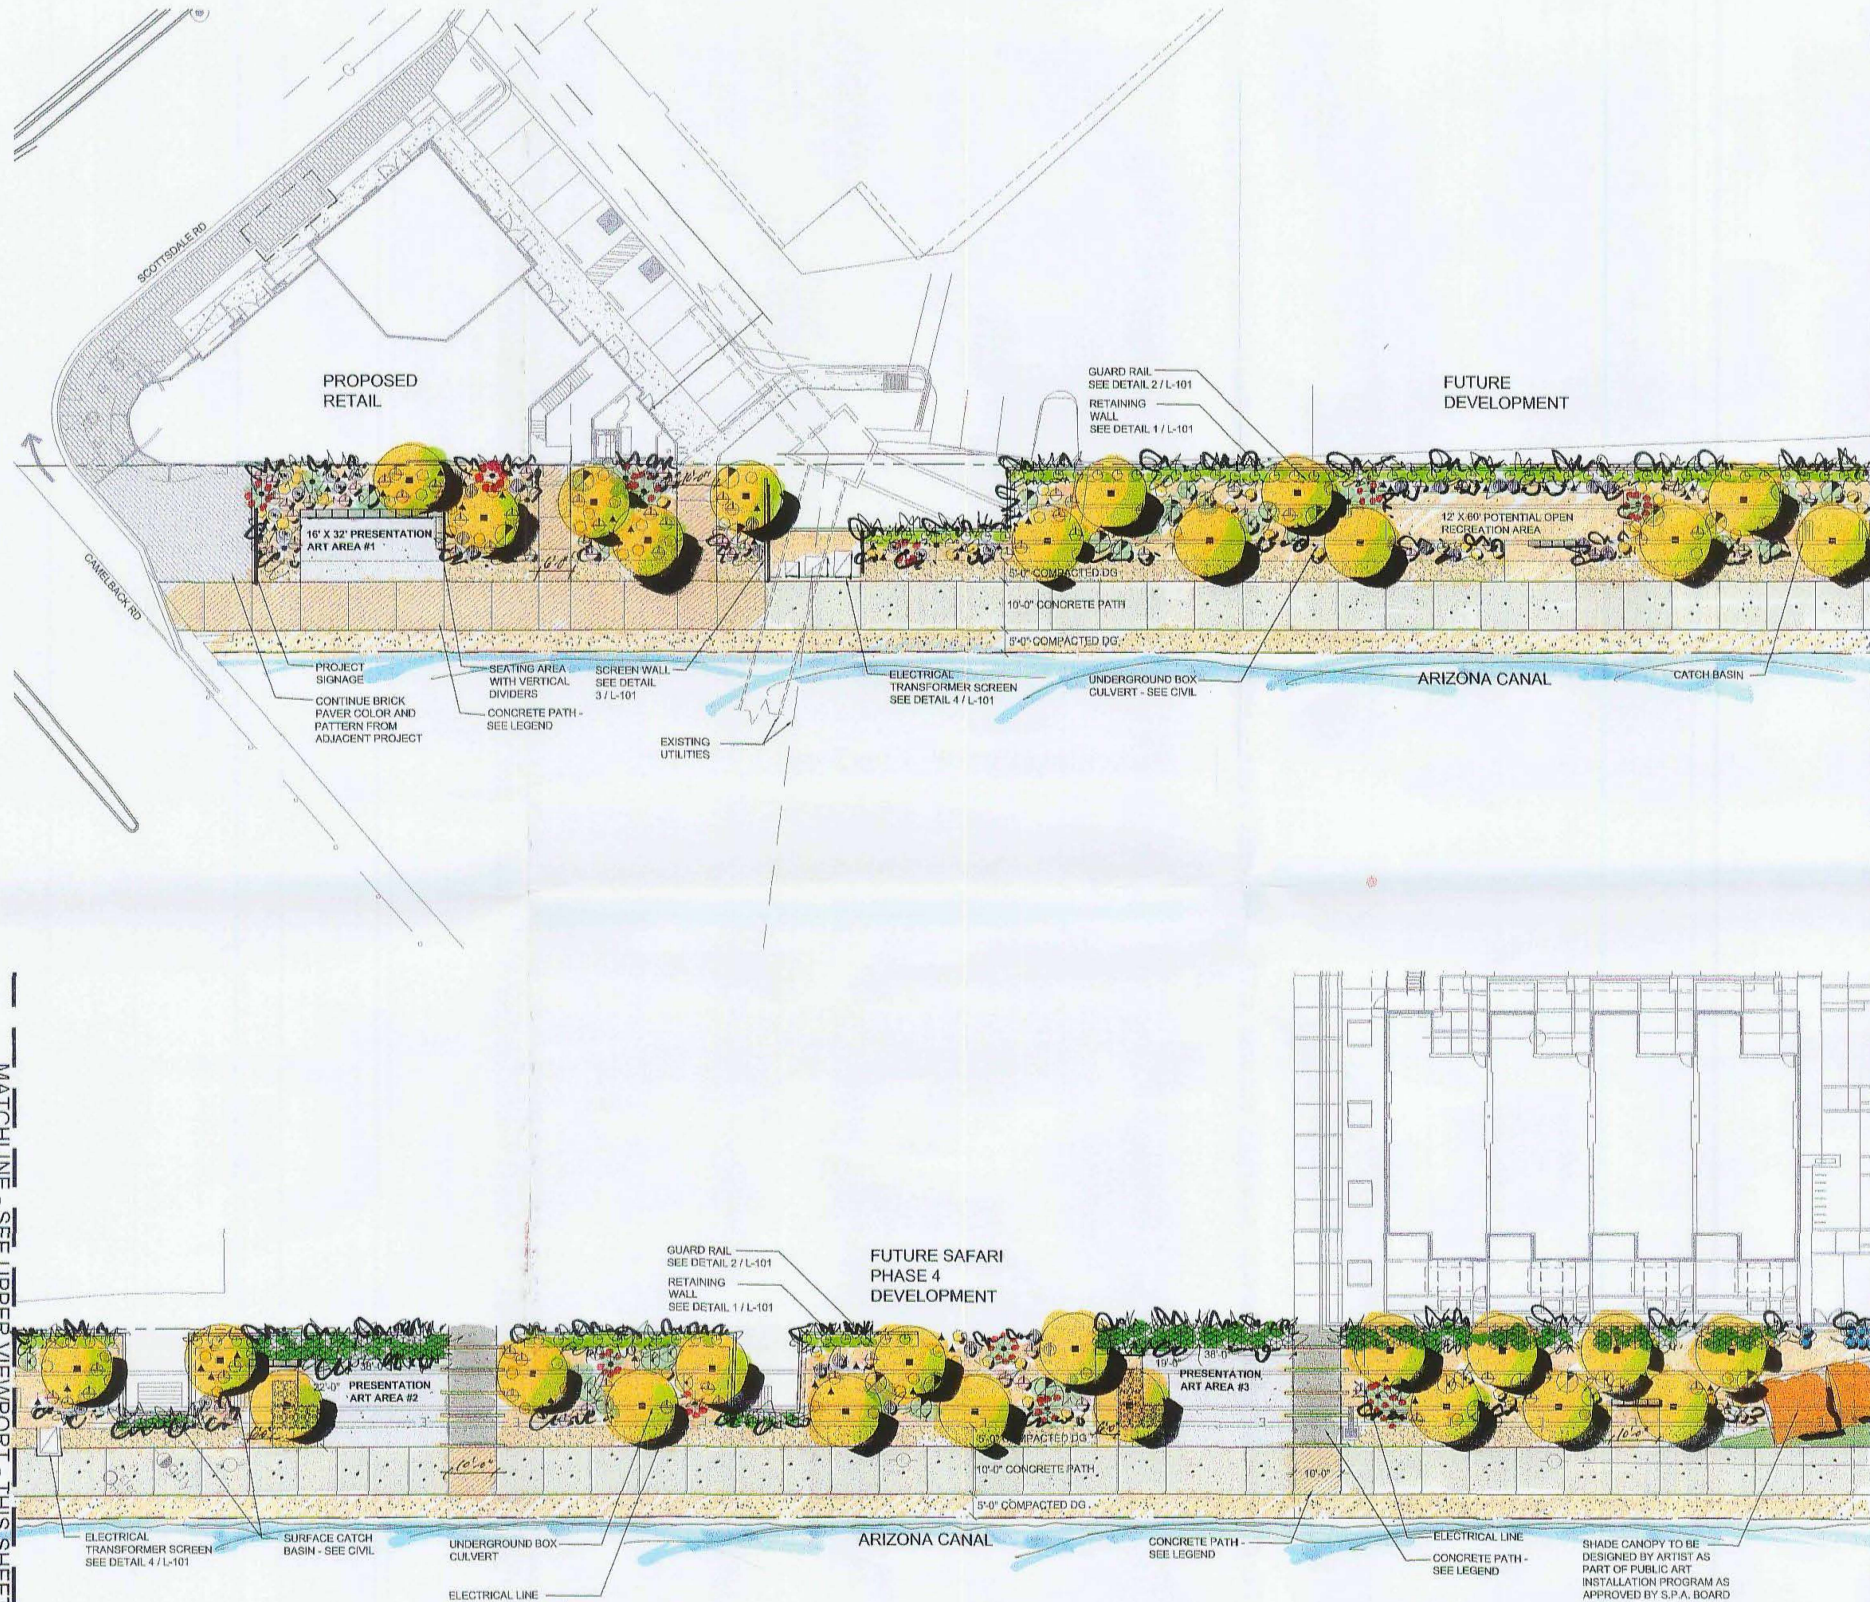

It should also be noted that the revised drive configuration onto Fashion Square Dr is different from what we agreed to with their civil engineer and we were not informed that it had changed. This is a critical intersection for all parties and needs to be better coordinated.

Respectfully,
Boyce
