Comment:

13-ZN-2020#2 (Axon): The Planning Commission should deny this request to rezone the Axon site. Axon already received approval to rezone the land to I-1 to build an HQ building larger than what is permissible on PCD land. No additional changes should be entertained. Further, Scottsdale does not need any more apartments; we need more single family homes. Applicant should only be permitted to rezone to build detached houses; otherwise, the land should be left for employment use, as this is the second best option. Finally, Axon has no intention of using all 1,965 of these dwelling units for employee housing; Axon has only 3,000 US-based employees. This is an effort by Axon to supplement its earnings with real estate income. The proposal does not conform to the Greater Airpark Character Area Plan, nor the Scottsdale General Plan 2035. The only beneficiaries of this change will be Axon shareholders.

Dear Planning Commission Members. I am writing in support of Axon's global campus. The campus will continue Axon's long tradition of bringing high-paying corporate, engineering and manufacturing jobs to Scottsdale. It will have public safety customers from all over the world traveling here to learn about Axon's technology while enjoying the city's amenities. It will also provide badly needed housing and amenities that will be a draw for talented employees who seek a work/life/play setting like the ones they are leaving in Seattle, Silicon Valley, etc. A little about myself. I am the Chief Legal Officer at Axon (where I've worked for 14 years) as well as a resident of Scottsdale (I live in Windgate Ranch). My wife is an NP with a medical practice in Scottsdale and my daughters are students at Copper Ridge and NDP. I moved here 20 years ago from Maine because I knew it was a wonderful city with a terrific quality of life, a reasonable cost of living and great economic opportunities. The global campus project is designed to embrace and enhance all of these considerations. For these reasons I ask you to support this project and all the Axon employees and families who work here and all of those who want to come here.

Comment:

Axon HQ Campus project The new Axon headquarters in Scottsdale will generate \$1.4 million annually in tax revenue, supporting public services without additional resident taxes, and bolster the local economy with increased spending from its well-paid workforce. The expansion will create up to 5,500 high-paying jobs and stimulate an estimated 13,300 additional jobs across various sectors, benefiting the broader community. The 44-acre campus will feature community-oriented spaces like parks and trails, integrating nearly 2,000 residential units to meet housing demands sustainably. Re-zoning to mixed-use will help maintain Scottsdale's quality of life by preventing an influx of warehouses. Axon's presence reinforces Scottsdale's position as a tech hub, promotes balanced development, and retains a valued local employer, enhancing property values, infrastructure, public safety, and education for residents.

I am both a resident of Scottsdale and an employee of Axon, and I am supportive of the Axon HQ Campus project. I have lived in Arizona since 2015, and in Scottsdale since 2019. I am a volunteer at the Arizona Humane Society and have worked at Axon for the last 5 years. The Axon HQ campus project will be beneficial for several reasons, one of the main ones being a significant boost to our local economy. With thousands of well-paid employees, Axon's expansion will increase spending in local businesses, creating a strong ripple effect that supports the city's economic growth. It will also create several thousand high paying jobs, boosting economic stability. Additionally, an estimated 13,300 additional jobs will be created across construction, hospitality, and retail, benefiting the entire community.

Comment:

I am submitting a statement in favor of supporting Axon's new global headquarters and campus. I am a 20+ year resident of Scottsdale, with two children that have attended public schools in Scottsdale. We have been very active in sports within the community and I have worked at Axon for the past 7 years. I wish everyone could understand the passion that our CEO has for helping our community. The whole point of Axon is to develop ways to make the community a safer place with a non-lethal option and to make first responders' lives easier so they can spend more time helping the community. Our headquarters campus is an extension of Axon's passion for the community. We view it as a way to continue to be part of the community, blend in with the community, and provide support to the community. The 44-acre campus will include parks, trails, a dog park, retail space and more to make it a welcoming space for Scottsdale residents to enjoy right alongside those of us that work at Axon. Additionally, the fact that Axon has actively revised designs based on community feedback to align with Scottsdale's character should demonstrate that Axon continues to be a collaborative part of this community. Axon has been in Scottsdale for 30 years and it would be so disappointing to see our city not be willing to work with and retain such a valued employer. I would think the City of Scottsdale would be proud to have Axon want to continue its legacy right here.

Dear Commission Planning, I moved to Scottsdale from Atlanta in 2020 after accepting a new job at Axon. My family and I love living in Scottsdale and we could not imagine being anywhere else. My 2 children have attended Great Hearts Archway and Pinnacle Presbyterian Pre-School in Scottsdale. Our extended family also recently moved from the east coast and permanently settled in Scottsdale after years of visiting us. I am strongly in favor of the Axon HQ campus project because I want to recruit talented and highly skilled workers to this wonderful community. I know Axon's presence in Scottsdale is instrumental in boosting our economy and ensuring that Scottsdale is an attractive location for tech workers across the country. If we do not invest in the new HQ campus, I am certain that we will force many of Axon's employees to relocate out of Arizona. We need to send a clear signal that Scottsdale values Axon and its contributions to our community. It would be short-sighted to not support the new campus. Tech companies are being lured by cities and states across the country for good reason. I sincerely hope Scottsdale makes the right choice and invests in the future of our community.

I am a Scottsdale native and an employee at Axon and I support the Axon HQ project. Since I just bought my first place in Scottsdale last year, I'm super excited about Axon's new headquarters—it should help boost property values, which is amazing news for a new homeowner like me! Axon's new headquarters is also putting Scottsdale on the map as a tech hub, attracting more innovation and making the area feel even more exciting and forward-thinking. As a lifelong resident, I'm thrilled to see Scottsdale growing in ways that benefit both our community and future generations.

My wife and I have lived in Scottdale for over 26 years and all 3 of our children were born and raised here in Scottsdale. We have a strong love and belief in our city as one of the finest in the country. We are proud to support the Axon HQ project as a very important one for our local economy and one that will attract and provide our community with talent, tax dollars and improve our city. Axon is a company where it's employees believe in its mission of ending the killing associated with gun violence and to protect the communities across our nation and the world with technology and innovation. Axon founder Rick Smith is a local leader from Chaparral High School that has created a company one of Arizona's great success stories. We are proud that our daughter did an internship with Axon while she attended Arizona State University and then was offered a position in their Leadership Development Program. Her two years in that program not only taught her great skills but it is where she met so many amazing co-workers turned friends from all over the country. Our daughter now been at Axon for over 5-years. We hope she stays with Axon her entire career, it is truly an amazing culture and firm. Please keep Axon and it's amazing people in Arizona. Axon is a thriving firm that is innovating our world to be a safer more responsible place. Thank you.

I'm excited to support the Axon HQ project and everything it's bringing to Scottsdale. My sister works at Axon and has had amazing opportunities there, so I've seen firsthand the positive impact they have. As someone who just bought a place here and works in commercial real estate, I can appreciate how this project will elevate Scottsdale's character and attract even more energy and connection. It's exciting to think about building a life and starting a family in a city that's growing in all the right ways, with a strong sense of community.

I would like to voice my support as it relates to Axon's plans for its global headquarters in Scottsdale. As a Scottsdale resident and voter since 2012, I found myself lucky enough to be hired by Axon in 2016. I cannot understate how much Axon treasures its presence in the community and how grateful I am that both my company and city share such a rich, intertwined history. Denying Axon's more than reasonable request for land use would be a serious blow to the city's path towards innovation and excellence. I humbly ask that the city approve Axon's request.

Hello, My name is Willie Pirc and I am a homeowner in Scottsdale as well as an employee of Axon. I am firmly in support of the Axon HQ Campus project. I believe there are several valuable aspects that this project would bring to Scottsdale, the most obvious being the economic boon in taxpayer revenue to the City of Scottsdale, high-paying jobs that will increase spending locally, as well as hosting events that will create surges in the Scottsdale area, similar to Spring Training. Another benefit I see is that the area is currently just a patch of desert dirt. Axon plans to create a unique space, that will include parks and retail spaces, providing more opportunities for Scottsdale residents to enjoy the area they live in. I think there are many other benefits, but these two I think are most significant. I think the council should strongly consider all of the benefits, as well as what else the space could be used for that may benefit the community much less than Axon's proposal. That patch of land is not going to be empty forever, so what is the best use of it? Thank you for your time. Willie Pirc

As an employee of Axon and a resident of Scottsdale living within 2 miles of the proposed new HQ, I have concerns over the new proposal for Axon's HQ. While I would love to have a new headquarters, the amount of development in the north Scottsdale area is very concerning to me. There are an overwhelming amount of high-rise developments and high density housing projects that have turned the charm of north Scottsdale from a quiet desert oasis where the scenic views prevail instead of urban sprawl, into a large cityscape where views are interrupted by eyesores and obvious quests for money and development opportunities. It is upsetting to see and thus I have concerns over the specific proposed HQ Axon has set forward. I believe the Axon headquarters is well deserved to be in Scottsdale, but as a local resident, I struggle to see its long term benefit for the residents already residing in Scottsdale.

I was born and raised in Scottsdale, but I never imagined it would be my forever home. Growing up, I often thought, “Why would anyone move here?” and “I can’t wait to leave.” However, after traveling to several countries and starting my college career in Tucson, I quickly realized what makes Scottsdale unique. Over the years, I’ve developed many favorites related to this city—whether it’s the schools I attended, the parks I played in, or the businesses I frequented. But in the past year, I’ve found a new ultimate favorite: Axon. At Axon, I’ve found a sense of community that is unmatched by any employer I’ve had. Not only do I enjoy the people I work with, but I also appreciate the culture and the mission. Every day, I feel like I can make a meaningful impact and work alongside others who are passionate about being part of something bigger than ourselves. Today, I think of Scottsdale as my forever home. I plan to raise a family here, buy a house, and build my career. The new Axon campus will bring significant benefits to both Scottsdale and the surrounding community. I believe Scottsdale must embrace its growth and find ways to nurture it, ensuring a sustainable future for residents. The Axon campus will not only boost the local economy but also provide more job opportunities and help keep Axon deeply rooted in Scottsdale. Now, when I think about the future, I find myself asking, “Why would I ever leave?” and “I can’t wait to build my future here in Scottsdale.”

Hello, my name is Brandy Burrows and I am a Scottsdale, AZ resident and current employee of Axon. I am writing in to advocate for the expansion of our Headquarters location. I have been employed by Axon for nearly 3 years and have been extremely impressed in our exponential growth especially when it comes to headcount growth and job opportunities in the area as I am a Corporate Recruiter for the organization. Have a new, state-of-the-art facility will aid in the recruitment efforts to continue to grow Axon as well as the jobs and economy of Scottsdale. I am also a parent of 2 children that benefit from the awareness of our public safety organization for school and community protection. I love being less than 15 mins from our Headquarters location and have a unique opportunity go into the office and collaborate in person with our leadership team to continue to align on company objectives and continued growth. I would hate for our Headquarters to move out of the area and it would have a serious negative impact on the Scottsdale community. Thank you! Best, Brandy Burrows Axon, Sr. Corporate Recruiter

As a 6+ year resident of Scottsdale, I urge the commission to approve Axon's campus plans. The economic impact in terms of revenue to Scottsdale, job creation, and expanded housing along with the positive community impact is tremendous. I have worked closely with Axon for 8 years and I can attest personally to their values-based approach to community engagement and sustainable growth. This is exactly the type of corporate investment that helps place Scottsdale in the fore front as an innovation and technology hub.

My name is Charley Moore, and I'm writing in support of Axon's new headquarters development. I moved to Scottsdale for Axon, and plan to stay here for the city of Scottsdale. Although many have the option to work remote, the sense of community, purpose, and support that the in-office experience offers is extremely valuable, especially for somebody just beginning their career. I hope to stay in Scottsdale, and live, work, and relax all within the community that work has provided me. When I weighed my options after college, the in-office experience was significant in deciding to join Axon, and I hope that future young adults like myself will continue to benefit from the incredible professional development opportunities that Axon offers in Scottsdale. These new headquarters will be a significant factor down the line when I decide whether to remain in Scottsdale, or work remotely.

Comment:

I chose to stay and work in Arizona, specifically Scottsdale, because I see it as a state and city that welcomes new opportunities, innovation, and growth. Young graduates and families also choose to live and work here because of the city's immense potential. I believe a vote in favor of the Axon campus fulfills the promise of a city that's motivated to be a land of opportunity and progress, rather than standing on the sidelines. What Axon proposes might be new, but a rejection of stagnation is what Scottsdale represents to me and other residents. This campus represents a model of the future—integrating work, living, and entertainment in one location for the convenience of the next generation.

I am writing to you in favor of Axon's global headquarters and campus. I am an Axon employee and a proud resident of Scottsdale. For background, I joined Axon after experiencing complications from an autoimmune deficiency, and learning that I likely will need a bone marrow transplant in 20 years. I realized that I needed to make a change, and, as a lawyer, find a career that was truly fulfilling to me. As a lawyer (who isn't in public service) it's hard to feel like you service a greater purpose other than billing by the 6 minute increment. I left private practice (I practiced with a local Scottsdale firm Brueckner Spitler & Shelts, fka Titus Brueckner & Levine) and joined Axon in Sep. 2022. I am so incredibly proud of the work we do at Axon. With our unwavering mission of protecting life, I am truly proud to say I work for Axon. I am even more proud that Axon is local and calls the beautiful city of Scottsdale Arizona home. Axon's new campus will allow for Axon to further expand its mission of protecting life, public safety and community. As a Scottsdale local and Axon employee, I am excited that Scottsdale has the opportunity to be home to a live-work space like so many up and coming cities. Axon's campus will shorten the commute for many of our incredible employees (and even eliminate the commute for many, resulting in 500-1,000 less cars in Scottsdale traffic and less pollution). For the employees interested in living close to work, this campus provides a rare opportunity to be part of the Scottsdale community that Axon already serves. Also, prior to working at Axon, employees go through extensive background checks and vetting. Therefore, the residents of Scottsdale can be assured that any Axon employee who lives on this campus will be fully vetted, have full time employment, and will be an asset to this incredible Scottsdale community. The City of Scottsdale is a piece of Axon's identity and has played a critical role in Axon's mission to protect life, advance public safety, and save lives. I hope that my comments give a light to one opinion of this project from a Scottsdale resident and Axon employee. With this campus, Axon will continue to join forces with this incredible city, and save lives.

I moved to Scottsdale a year and a half ago, a few weeks before I started my job at Axon, and just 2 months after I graduated from Duke University. I got a degree in Mechanical Engineering, but when I graduated, I didn't really know what I wanted to do or who I wanted to be. One thing I knew for sure, was that I wanted to be part of a company that worked day in and day out to make the world a better, safer place. I chose to pursue engineering because I cared about building systems or products that actually meant something, and I thank God for helping me find a company that truly centers every decision in the pursuit of that end. I didn't know anyone when I moved here, but I had heard such wonderful things from where I grew up in the suburbs of New York, that I was ready to take that risk. The funny thing is, to this day, whenever I go back friends and family remind me of how proud they are of me. The first time I heard it I thought it was most peculiar, because most of them had no idea how lonely it could get. But now, I realize that they are proud because I allowed myself to experience an entirely new culture, leave the comfort of the familiar, and fall in love with a new city thousands of miles away from my previous home. I wouldn't have done this if I hadn't had the comfort of community that I fell into through the Leadership Development Program. Since I started at Axon, I've seen dozens and dozens of other employees who are early in their career, committed to making a difference through technology, but who didn't know where to live when they moved here, and because of that missed out on much of the community I have been fortunate to embrace. The New Yorker, and the recent college student, in me still loves to walk. If we had a headquarters like what is proposed -- where I could walk to work (instead of waste an hour a day or more commuting), where I could walk to meet up with my friends (the majority of whom I meet at work), and where I could walk to pick up lunch and dinner (only when necessary, I still love to cook) -- my life would only get better and better.

I am a proud Scottsdale resident and Axon employee. It is my privilege to be able to voice my support of the futuristic Axon HQ Campus project. For over 30 years Axon has been committed to safety and community. With this development project that encompasses not only housing, but green space, other local business, we will be able to continue our legacy of doing good for the neighborhood in where we work and live in.

PLEASE Support Axon's Global Campus. As the second longest member at Axon, I have lived the experience as an original Scottsdale native growing up near Turney & Osborn. Nothing gives more pride than enduring almost 31 years of Axon from its extremely hard startup to where it is now a true pillar to the community. We have been true to Scottsdale from our humble first offices on E Evans Dr to our flagship HQ north of the Airpark. We've also been GREAT neighbors to this area and now it's time to building an amazing global campus would be a shining star of an HQ showcasing our city's startup turned leader in Protecting Life with our life-saving TASER energy weapons, our accountable in-car and body-worn cameras, drones (including our Axon Aid drones that help communities all over the US during natural disasters, drones as a first responder to counter drone protection), real-time crime centers, AI, etc. The City of Scottsdale should be beyond proud to be the hometown HQ of Axon. We are the recognized leader in local, state and federal public safety, international law enforcement and the military. We bring thousands of high-profile agencies and leaders here for conferences proudly showing off our desert city. Our impact on the city is beyond clear to us employees but perhaps the Council members should remember our direct economic impact from taxes, salaries, to spending money every day here with the hundreds and soon to potentially 5000+ employees. The city gains from our high-value and high wage employees as well as promoting the City of Scottsdale with a futuristic HQ that will be the envy of the US - not just Arizona. We need this building to grow and sustain our tremendous impact on public safety. We have pro-law enforcement employees who WANT to be here in this beautiful area, and this would be this an innovation and technology hub. There is everything to gain in this development for a premier global campus. Please consider how we have been quiet and how we have handled our growth. It has been a net positive. Please support our efforts in our investment that WILL boost property values, provide substantial tax revenue, and fund infrastructure, public safety, and education, enriching the quality of life for all Scottsdale residents. This is a sure bet for Scottsdale and you all should be very proud to support this company that has struggled for years with grit and persistence and pure passion to achieve the American Dream.

Hello members of the Scottsdale City Council and Planning Commission. As a Scottsdale resident for the past 18 years and homeowner for the past 16 years, I am writing to you today to express my support for the Axon HQ Campus project. I have been employed by Axon for over 5 years and could not be happier with the company and our mission to assist law enforcement and obsolete the bullet. It's truly amazing that Scottsdale is the home to the "Apple of public safety", bringing tax dollars and high paying jobs to the city. The new HQ campus will attract talented professionals here and strengthen our city's position as a technology hub for decades to come. I am sincerely enthusiastic about keeping our HQ right here and look forward to the community-oriented spaces that the campus will provide. I encourage you to join me in the support for a unique new place that will benefit both employees and local residents. Thanks.

November 12, 2024

City of Scottsdale
City Council
3939 N. Drinkwater Blvd.
Scottsdale, Arizona 85251

Dear Mayor Ortega and City Council Members:

On behalf of the Major County Sheriffs of America (MCSA), I am pleased to support Axon's decision to establish its new headquarters in Scottsdale, Arizona. This expansion demonstrates Axon's continued dedication to advancing public safety technology and creating solutions that empower law enforcement agencies across the nation. As an association, MCSA represents the largest Sheriff's Offices in the country and our members serve over 130 million citizens.

At the Major County Sheriffs of America, we are committed to improving public safety through collaboration, accountability, and the thoughtful adoption of technology. Axon's work in developing tools like body-worn cameras, less-lethal options, and cloud-based evidence management systems aligns closely with our mission to support the safety and effectiveness of law enforcement professionals. Their innovations enhance transparency and help strengthen the trust between law enforcement and the communities they serve.

By choosing Scottsdale as the home of their new headquarters, Axon is investing in a community that shares its forward-looking values and commitment to public service. This new facility will foster collaboration with agencies nationwide and will provide new opportunities to develop life-saving technologies that make our communities safer.

I am confident that this move will be mutually beneficial for Axon and the Scottsdale community, helping advance public safety for years to come. MCSA will remain a committed partner to Axon and its innovations in public safety.

Thank you for considering this important development. I look forward to seeing the positive contributions that Axon's Scottsdale headquarters will bring to our field.

Sincerely,

Megan E. Noland
Executive Director
Major County Sheriffs of America

**SCOTTSDALE STONEBROOK II RESPONSE
TO AXON RESUBMITTAL 13-ZN-#2022-2**

Updated November 2024

Who We Are

We are an established 174 single-family home community immediately adjacent to the Axon land, and we have concerns about the latest Axon proposal.

With the Axon proposal, we face a highly dense development adjacent to us.

Our main objective is to protect our home property values.

Our issues are not with Axon, the technology company.

Our issues are with specific elements of the proposed project.

The resubmittal adequately addresses several of our community's concerns:

- The roads have been realigned to minimize direct impacts on our community. The roundabout has been removed, and Mayo Blvd. has been retained to maintain access to the neighborhood.
- Setback distances have been increased, and landscaping has been improved to help protect our privacy.
- The heights of the buildings closest to us have been reduced. However, we would like to see them decreased even further to enhance privacy and limit visibility.

Our Prevailing Issue Is Density & Its Related Impacts

Buildings of 3 stories are too high next to an established residential community and would threaten our privacy and property values. 1 story can be as high as 15 feet.

Reference the 3-story Mark Taylor San Artes apartments west of us on Hayden Road that have a clear view into backyards and bedrooms.

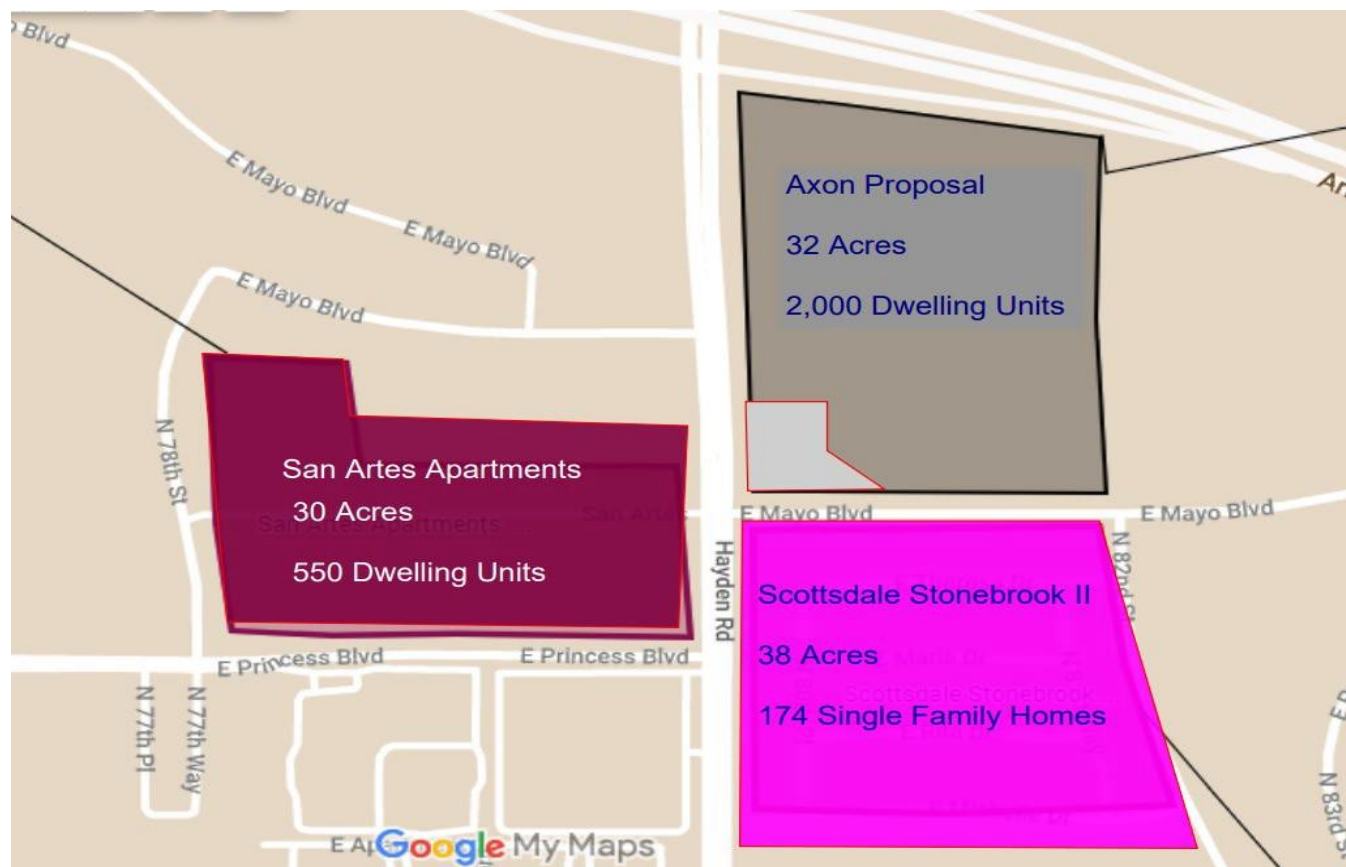

No one in our community should have to be concerned with a lack of privacy from the Axon plan.

View of 3-story Mark Taylor San Artes apartment complex from Stonebrook II community as it looms over homes and affecting home values.

The Surrounding Residential is Not of Similar Density

We have compared apartment projects nearby, and they are not near the density of this proposal. Here's an example:

Density-Continued

- Reduce building height overall (remember, one story can be as high as 15 feet or more), with an enforced two-story limit on structures closest to our community, whether hotel or not.
- Structures higher than two stories should be located on the far north side of the Axon property, closest to the 101 freeway. Due to proximity to s-f residential, height restrictions are warranted.

Traffic

- While the resubmittal addresses many of our concerns about traffic impacts, the impacts of this dense project on surrounding city streets like North Hayden Road are very concerning.
- This area is already experiencing heavy traffic and is rated near “failing” by city traffic engineers in terms of “ease of use.”
- Some SSII owners are also expressing concern about subsequent traffic increases on Princess Road.

In Summary

We appreciate the revisions in the plan that consider our community's concerns.

Moving forward, we ask that Axon and the city:

- Protect our property values from potential harm and safeguard our owners' privacy.
- Preserve our community by limiting building heights to specific feet and ensuring they are located away from residential areas.
- Evaluate traffic impacts on Hayden Road and Princess Road.

REQUEST TO SPEAK

☒ I WISH TO SPEAK ON AGENDA ITEM # 4 ☐ I WISH TO DONATE MY TIME TO _____

☐ I WISH TO SPEAK DURING "PUBLIC COMMENT"* CONCERNING _____

*Citizens may complete one Request to Speak "Public Comment" card per meeting and submit it to City Staff. "Public Comment" time is reserved for citizen comments regarding non-agendized items. The Board and Commission may hear "Public Comment" testimony, but is prohibited by state law from discussing items which are not listed on the agenda.

This card constitutes a public record under Arizona law.

REQUEST TO SPEAK

Request to Speak cards must be submitted to City Staff **BEFORE** public testimony begins.

Public testimony is limited to three (3) minutes per speaker.

Additional time **MAY** be granted to speakers representing two or more persons.

Cards for designated speakers and the person(s) they represent must be submitted together.

MY CONCERN IS THE PROBLEM OF TRAFFIC
TRYING TO GET ON THE 101 AT HAYDEN & PRINCESS -
THE TRAFFIC BACKS UP NOW WITH THE RESTRICTION
THERE IT WILL BE WORSE ON HAYDEN - WILL RED & GREEN LIGHTS
BE INSTALLED?
