Development Review

Development Application Checklist

Minimal Submittal Requirements:

At your pre-application meeting, your project coordinator will identify which items indicated on this Development Application checklist are required to be submitted. A Development Application that does not include all items indicated on this checklist may be rejected immediately. A Development Application that is received by the City does not constitute that the application meets the minimum submittal requirements to be reviewed.

In addition to the items on this checklist, to avoid delays in the review of your application, all Plans, Graphics, Reports and other additional information that is to be submitted shall be provided in accordance with the:

- requirements specified in the Plan & Report Requirements For Development Applications Checklist;
- Design Standards & Policies Manual;
- requirements of Scottsdale Revised Code (including the Zoning Ordinance); and
- stipulations, including any additional submittal requirements identified in the stipulations, of any Development Application approved that this application is reliant upon; and
- the city's design guidelines.

If you have any question regarding the information above, or items indicated on this application checklist, please contact your project coordinator. His/her contact information is on the page 12 of this application.

Please be advised that a Development Application received by the City that is inconsistent with information submitted with the corresponding pre-application may be rejected immediately, and may be required to submit a separate: pre-application, a new Development Application, and pay all additional fees.

Prior to application submittal, please research original zoning case history to find the original adopted ordinance(s) and exhibit(s) to confirm the zoning for the property. This will help to define your application accurately. The City's full-service Records Department can assist.

PART I -- GENERAL REQUIREMENTS

Req'd	Rec'd	Description of Documents Required for Complete Application. No application shall be accepted without all items marked below.
<input checked="" type="checkbox"/>	<input type="checkbox"/>	1. Development Review Application Checklist (this list)
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	2. Application Fee \$ <u>1515</u> (subject to change every July)
<input checked="" type="checkbox"/>	<input type="checkbox"/>	3. Completed Development Application Form (form provided) <ul style="list-style-type: none"> • The applicant/agent shall select a review methodology on the application form (Enhanced Application Review or Standard Application Review). • If a review methodology is not selected, the application will be review under the Standard Application Review methodology.
<input type="checkbox"/>	<input type="checkbox"/>	4. Request to Submit Concurrent Development Applications (form provided)
<input checked="" type="checkbox"/>	<input type="checkbox"/>	5. Letter of Authorization (from property owner(s) if property owner did not sign the application form)

Development Applications Process

Enhanced Application Review Development Review (DR and PP)

Enhanced Application Review Methodology

Within the parameters of the Regulatory Bill-of-Rights of the Arizona Revised Statutes, the Enhanced Application Review method is intended to increase the likelihood that the applicant will obtain an earlier favorable written decision or recommendation upon completion of the city's reviews. To accomplish this objective, the Enhanced Application Review allows:

- the applicant and City staff to maintain open and frequent communication (written, electronic, telephone, meeting, etc.) during the application review;
- City staff and the applicant to collaboratively work together regarding an application; and
- City staff to make requests for additional information and the applicant to submit revisions to address code, ordinance, or policy deficiencies in an expeditious manner.

Generally, the on-going communication and the collaborative work environment will allow the review of an application to be expedited within the published Staff Review Time frames.

Note:

1. Time period determined by owner/applicant.
2. All reviews and time frames are suspended from the date a the letter is issued requesting additional information until the date the City receives the resubmittal from the owner/applicant.
3. The substantive review, and the overall time frame time is suspended during the public hearing processes.
4. Owner/applicant may agree to extend the time frame by 50 percent

Time Line

Administrative Review 15 Staff Working Days Per Review	Substantive Review 95 Total Staff Working Days, Multiple Reviews In This Time Frame ^{2,3,4}	Public Hearing Process Time Frames Vary ³	Approval/Denial Letter Issued
---	---	---	----------------------------------

Development Applications Process

Standard Application Review

Development Review (DR and PP)

Standard Application Review Methodology:

Under the Standard Application Review, the application is processed in accordance with the Regulatory Bill-of-Rights of the Arizona Revised Statutes. These provisions significantly minimize the applicant's ability to collaboratively work with City Staff to resolve application code, ordinance, or policy deficiencies during the review of an application. After the completion the city's review, a written approval or denial, recommendation of approval or denial, or a written request for additional information will be provided.

The City is not required to provide an applicant the opportunity to resolve application deficiencies, and staff is not permitted to discuss or request additional information that may otherwise resolve a deficiency during the time the City has the application. Since the applicant's ability to collaboratively work with Staff to resolve deficiencies is limited, the total Staff Review Time and the likelihood of a written denial, or recommendation of denial is significantly increased.

- Note:
1. Time period determined by owner/applicant.
 2. All reviews and time frames are suspended from the date a letter is issued requesting additional information until the date the City receives the resubmittal from the owner/applicant.
 3. The substantive review, and the overall time frame time is suspended during the public hearing processes.
 4. Owner/applicant may agree to extend the time frame by 50 percent

Time Line

Administrative Review	Substantive Review	Public Hearing Process	Approval/Denial Letter Issued
15 Staff Working Days Per Review	95 Total Staff Working Days, Two Reviews In This Time Frame ^{2,3,4}	Time Frames Vary ³

Request for Site Visits and/or Inspections Development Application (Case Submittals)

This request concerns all property identified in the development application.

Pre-application No: 1011 - PA - 2015

Project Name: AERIES

Project Address: 3214 N 70TH ST

STATEMENT OF AUTHORITY:

1. I am the owner of the property, or I am the duly and lawfully appointed agent of the property and have the authority from the owner to sign this request on the owner's behalf. If the land has more than one owner, then I am the agent for all owners, and the word "owner" refer to them all.
2. I have the authority from the owner to act for the owner before the City of Scottsdale regarding any and all development application regulatory or related matter of every description involving all property identified in the development application.

STATEMENT OF REQUEST FOR SITE VISITS AND/OR INSPECTIONS

1. I hereby request that the City of Scottsdale's staff conduct site visits and/or inspections of the property identified in the development application in order to efficiently process the application.
2. I understand that even though I have requested the City of Scottsdale's staff conduct site visits and/or inspections, city staff may determine that a site visit and/or an inspection is not necessary, and may opt not to perform the site visit and/or an inspection.

Introduction

Landmark Homes has been providing exceptionally constructed, sustainable and innovatively designed homes and communities since 1977. True to the company's core values, Landmark Homes USA is seeking Development Review approval to create yet another distinctive, premiere, for-sale urban residential opportunity at the subject +/- .946 gross acre property located at the northwest corner of 70th Street and the Monterey Way alignment.

Currently the host of a vacant building and parking lot, this Site offers a fitting redevelopment opportunity in a uniquely prime location. This proposal for 16 high-end, for-sale single-family attached townhomes will consist of a plan to build four three-story, four-unit buildings. The plan will take advantage of the proximity to Downtown Scottsdale and the existing R-5 zoning to promote new residential opportunities near both the Downtown Core and the Scottsdale Road regional corridor. This proposed community is responsive to the City's General Plan land use designation of Urban Neighborhoods and is positioned to be valuable part of the evolving context of the greater Downtown area.

Context

Currently unoccupied, this flat infill parcel had most recently been used by a church, who has since moved to another location. The rest of the surrounding neighborhood is an established area with a mix of commercial, employment, residential and religious uses. The Site is generally surrounded by 2-story condominiums and apartments, the First Baptist Church of Scottsdale, a 3-story townhome development under construction to the east and a single family detached residential neighborhood to the west. Specifically, the adjacent uses are as follows:

- North: Casa Granada Condominiums (R-5)
- East: Aerium Encore Townhomes Condominiums (R-5),
Colonial Grand Apartments (R-5)
- South: Scottsdale Townhouse Apartments (R-5)
- West: Western Villa 2 (R1-7)

The project is also located within the Southern Scottsdale Character Area, which recognizes the Urban Neighborhoods land use designation of the 2001 General Plan, consistent with the proposed density. In addition, it incorporates community goals and policies consistent with - but not duplicative of - the Scottsdale General Plan elements that speak specifically to the special attributes of Southern Scottsdale and how it functions.

As described in the Area Plans Vision Statement, South Scottsdale is a diverse, sustainable community built upon vibrant neighborhoods, thriving economic corridors and innovation businesses. Aeries plans to add to this sustainable future that celebrates neighborhoods and promotes reinvestment and redevelopment as guided by the following values:

- Reinvest in underutilized properties near Southern Scottsdale's corridors.
- Provide diversity in the surrounding housing choices.
- Create a sustainable neighborhood promoting social interaction and local economy support.
- Promote alternative transportation choices/options.
- Provide opportunities for open space and public gathering places.
- Promote shade and pedestrian/ bicycle friendly streets.
- Utilize proximity to regional resources.

Through these values, Aeries will assist in transforming the Southern Scottsdale vision into the built environment of the community. Additionally, this proposal will complement the surrounding area and will help take advantage of existing infrastructure and promote the community goal of encouraging infill development.

Sensitive Design

Aeries has paid special attention to the sensitivities that accompany urban infill development. The proposed site plan and building designs create architectural and design transitions between the proposed and the existing development, in order to respect the lower-scale neighborhoods. Large proposed setbacks and landscape buffers to the west, in addition to strategic building orientation, will ensure protection to the adjacent single-family development. Private yards will separate the proposed buildings from the multi-family uses to the north and south while 4,000 s.f. of frontage open space and a 25 foot landscaped buffer will be provided to the east, along 70th Street, to create an appealing street presence for the community. An existing sidewalk, lined with enhanced landscaping, will establish an attractive street environment, for residents and neighbors alike, and will connect the community with the surrounding neighborhoods and create a visually attractive spatial relationship to the adjacent developments.

The main entry to the project will be located at the midpoint of the site's 70th Street frontage. The entry experience will feature a pedestrian portal that creates a memorable gateway between the public sidewalk and the project's "front lawn" for residents and visitors alike. The architecture of the portal will utilize materials found on the buildings, and will also incorporate the same wall mounted lighting sconces

that are found inside the Site. The monument sign is located on the opposite side of the entry drive from the portal, to create a balanced composition. The sign is designed at an intentionally pedestrian scale, and ties in multiple materials found on the architecture. An automatic rolling vehicular "privacy gate" will screen the internal street traffic from offsite view. It will open to all traffic and will not require a code for access. A 3' high steel view fence just inside the property line continues the character of the low, horizontal lines established by the sign and gate, repeating the same steel mesh panels that will be used on the building balconies. The fence provides a textural, transparent backdrop for the enhanced planting arrangement that lines the public sidewalk.

The internal drive has been designed to include a minimum width of 24' of pavement to facilitate vehicle and emergency access throughout the site. Additional area is being set aside, through the application of enhanced paving, to safely guide pedestrian circulation throughout the Site from 70th Street on the east over to the refuse cans in the alley to the west. Guest parking spaces are provided toward the rear of the community with additional guest parking available along 70th street.

The architecture has been designed to create a unique soft-contemporary feel, which is set off by a mix of desert adapted plant materials and complementing accents, warmed by the application of Hardie and stone siding, wire mesh accents, and metal window extrusions. A warm and timeless color palette will be sensitive to the evolving context of this designed area over time. The design will be a logical hierarchy of masses characterized by contemporary, streamlined shells accented by varied rooflines, staggered building frontages, and spacious balconies. The variety of exterior materials, bump-outs, balconies, and windows break up the building's mass into smaller, human-sized elements, which provide visual interest and richness while reducing the overall building mass.

The three different unit types, ranging from 1,400s.f. to just under 2,000s.f., provide variation within the Site while maintaining a cohesive community. Each unit will have a private yard, two car garage as well as outdoor patios and/or balconies, which respond to the Sonoran desert environment and promote outdoor living.

With a mixture of surrounding architectural styles, the proposed architecture will enhance and strengthen the design character of the surrounding area. Rather than directly imitate the surrounding styles, Aeries will progress the architecture toward something fresh and defining with a character that remains complementary to the existing neighborhood design. The proposed Aeries architecture, materials, and open space plantings offer a new twist on the established architecture within the vicinity.

The proposed amenities for the Aeries residents have been integrated into the site in the same way that exterior spaces would be found around a large residence. Rather than program all of the amenities into one large central space, several smaller and

more intimate gathering spaces have been provided in order to enhance the overall character of the landscape, while providing opportunities for a range of passive recreational uses. Each of these spaces has a character of its own and responds to the space and microclimate created by the placement of the furnishings around it. The northernmost area will be a space where residents can sit and relax in a flexible patio space, which overlooks a lawn and barbeque area, providing an iconic place for outdoor cooking, dining and lounging. To the South, an intimate raised organic garden will provide neighbors an area to socialize and grow fresh fruits and vegetables.

Conclusion

We respectfully request approval of this Development Review application as the proposed project supports the City of Scottsdale's desire to create vital, viable and desirable residential settings that are situated near an established mix of uses, as this property is. Coupled with the existing R-5 Multi-Family Residential District zoning and General Plan Land Use designation of Urban Neighborhoods, the proposed site plan, landscape plan and site designs would respond appropriately to the current urban context by contributing a fittingly located, high quality, innovatively designed residential community, the type of project at which Landmark Homes USA excels.

Development Review Board Criteria

1. **The Board shall examine the design and theme of the application for consistency with the design and character components of the applicable guidelines, development standards, Design Standards and Policies Manual, master plans, character plan and General Plan.**

Response: The proposed 16 unit single-family attached townhome development is in substantial conformance with the current General Plan Land Use of Urban Neighborhoods. The Land Use Element describes this category as areas of multi-family dwellings with densities usually more than eight dwellings per acre. Also the existing context of the proposed development is consistent with the intent of the Urban Neighborhoods category, as described generally by areas located near retail centers, offices, or other compatible non-residential uses. Consistent with the goals of the Land Use Element this use will support the balance of land uses while promoting development patterns and standards that are consistent with the surrounding area's character.

2. **The architectural character, landscaping and Site design of the proposed development shall:**

- a. **Promote a desirable relationship of structures to one another, to open spaces and topography, both on the Site and in the surrounding neighborhood;**

Response: Strategic placement of open spaces will promote on-site accessibility and neighborhood interaction while establishing thoughtful landscaped setbacks, which will provide visual intrigue and allow the project to integrate seamlessly within the surrounding varied uses.

- b. **Avoid excessive variety and monotonous repetition;**

Response: The proposed high quality architecture, staggered setbacks and curvilinear street will provide variation within a controlled unified theme in order to avoid excessive variety and monotonous repetition.

- c. **Recognize the unique climatic and other environmental factors of this region to respond to the Sonoran Desert environment, as specified in the Sensitive Design Principles;**

Response: Residences will respond to the desert climate through the implementation of deep roof overhangs, recessed windows, shaded rear patios, deep recessed balconies for shade, and window shade apparatus as a part of the design. Elements such as durable siding and materials will be designed to hold up to the harsh sun and provide relief in hot summers. The yards and balconies take advantage of Arizona's climate to promote three-season outdoor living.

- 3. Ingress, egress, internal traffic circulation, off-street parking facilities, loading and service areas and pedestrian ways shall be so designed as to promote safety and convenience.**

Response: At this location, 70th Street is classified as a suburban local collector and has 60' of dedicated right of way. Given the context of the site and the surrounding amenities, the proposed development will help emphasize the pedestrian relationship between surrounding land uses in an effort to reduce the demand, distance and frequency of automotive trips.

- 4. If provided, mechanical equipment, appurtenances and utilities, and their associated screening shall be integral to the building design.**

Response: All mechanical equipment, appurtenances, and utilities will be screened by both the building parapet and associated Site walls that are integral with the building and architectural design. Trash will be discretely located and oriented toward the rear of the Site for alley pickup.
