INSTALLATION INSTRUCTIONS

INSTRUCTIONS PERTAINING TO RISK OF FIRE, OR INJURY TO PERSONS

- WARNING!** To reduce the risk of FIRE OR INJURY TO PERSONS
- Do not touch luminaire while lamp is on. Turn off lamping and allow to cool before replacing lamp.
 - Lamp gets HOT quickly! Contact only switch/plug when turning on.
 - Do not touch hot lens, faceplate, body, or cap.
 - Keep lamp away from materials that may burn.
 - Do not touch lamp at any time. Use a soft cloth. Oil from your skin may damage lamp.
 - Do not operate the luminaire with damaged or missing parts.
 - Do not disassemble lamp housing beyond cap removal to facilitate lamp replacement.
 - Remove any debris accumulated on the faceplate, in the housing, or in the body fins when necessary.
 - Do not install luminaire within 10 feet of a pool, spa, or fountain.
 - Have fixture installed in accordance with all applicable installation codes and standards by a person familiar with the construction and operation of the fixture and the hazards involved.
 - Use only cable rated for low voltage. Cable buried more than 6" must be suitable for direct burial.
 - Use only lamps rated for this fixture. 12 volt 35 watt maximum MR16.

SAVE THESE INSTRUCTIONS

INSTALLATION

- If preinstalled, remove light well cover from tree grate.
- With tree grate installed, excavate under light opening to the depth of the Shield (About 7" below grade) enough to allow shield to drop fully into grate.
- In poor draining soils, excavate an additional 3" below bottom of shield and fill space to bottom of shield with gravel for drainage.
- Attach lamp housing and Yoke Assembly to the Cover Plate with the three screws provided.
- Feed Supply Cable through Shield.
- Drop Shield into tree grate opening insuring it seats fully on lip.
- Connect Supply Cable to 16-2 Cable on fixture. Allow enough cable length to permit complete removal of Assembly from Light well for re-lamping. Ensure power being supplied is appropriate to fixture.
- Insert Cover Plate with Lamp Assembly into Light well and secure with screw.

AIMING OF FIXTURE

- Caution! Fixture will be hot if lamp is on.
- Remove Cover plate screw and lift assembly out of tree grate.
- Loosen Vertical Aiming Screws
- Adjust Yoke as desired
- Tighten Screws
- Replace Assembly in Light well opening.

RE-LAMPING

- Remove power from fixture and let cool before touching.
- Remove Cover Plate with attached assembly from tree grate.
- Separate Yoke Assembly from Cover Plate by removing three screws.
- Loosen Set Screw on lamp housing. Do NOT remove set screw!
- Remove Lamp Housing Top by slowly twisting and pulling to reduce risk of damage to O-Ring.
- Pull lamp straight out. Caution! Lamp may still be hot! Be sure lamp has cooled before touching.
- Push new lamp straight in. Be sure pins are properly aligned. Be sure correct Lamp wattage is used. See inside lamp housing for Lamp ratings.
- Install Lamp Housing Top by slowly twisting and pushing. Due to tight O-Ring seal you will notice resistance as air pressure builds up.
- Seat Top fully and tighten set screws until it just bottoms out. Do NOT over tighten set screws! Distortion of the housing can allow moisture in causing fixture failure.
- Re-mount Yoke to Cover and Reinstall in tree grate.

Shielded bollard
with symmetric light distribution

Bollard luminaire with rotationally symmetric light distribution. This robust luminaire provides glare-free illumination perfect for squares, pathways and entrances. Provided with mounting system that allows the luminaire to be adjusted independent of anchor bolt orientation.

Die-cast and extruded aluminum · Clear safety glass
Reflector made of pure anodized aluminum

LED color temperatures: 2700K, 3000K, 3500K, 4000K

BEGA luminaires offer a minimum service life of 60,000 hours, with suitable LED replacement modules guaranteed for up to 20 years after date of purchase. Further LED technical data including luminous flux, CRI, dimming and electrical characteristics are provided on the individual luminaire specification sheets, available at www.bega-us.com

All BEGA standard finishes are matte, textured powder coat with minimum 3 mil thickness. BEGA Unidure® finish, a fluoropolymer technology, provides superior fade protection in Black, Bronze, and Silver. BEGA standard White, as well as optionally available RAL and custom colors, are a polyester powder.

NRTL listed to North American standards · Suitable for wet locations
Protection class IP 65

Light building elements
with symmetric light distribution

A series of light building elements with symmetric light distribution. Light building elements are luminous design features for public areas. They are ideally suited for delineating and structuring interior and exterior spaces such as landscape areas, plazas, building entrances and atria.
